Personal Profile

I am an inquisitive and passionate mathematician who is extremely interested in entering the technology industry. I have a real interest in the sector with its ever-changing, undeniable presence in our every-day lives, and am keen to explore all aspects of it. I am hard-working and not afraid of a challenge, using my communication skills to deliver results regardless of circumstance. I can combine my interpersonal skills with strong attention to detail to become a real asset to your team.

Education

2015-2019 **Master of Mathematics**

Durham University

Graduated with a 2:1

2013-2015 **A Levels**

Hills Road Sixth Form College

Mathematics A* | Further Mathematics A | Chemistry A | Philosophy B

Skills

- | | |
|---------------------------|---------------------|
| ● Python (Intermediate) | ● Excel (Competent) |
| ● HTML (Intermediate) | ● C++ (Basic) |
| ● CSS (Competent) | ● Haskell (Basic) |
| ● Javascript (Competent) | ● Prolog (Basic) |
| ● Coreldraw (Experienced) | ● Express (Basic) |

Experience

- Used Python to produce graphs, solve equations and complete numerical analysis. This enhanced my mathematical reports and helped solve homework problems.
- Produced a website using Javascript, HTML, CSS and Express that allowed the user to search through an events API, as well as adding to lists stored in JSON files.
- Completed online coding courses while on furlough this year, and am in the process of creating a portfolio website to showcase my skills.
- Gained excellent problem solving skills throughout my degree, growing confidence in numerical tasks each year.
- Learned the basics of Prolog, Haskell, and C++ in a Computer Science module, and thoroughly enjoyed taking on the challenge of learning several new languages in a short space of time.

Work Experience

2011-present **Sales Assistant, Talking Ts**

- Training new staff members, which developed my managing and mentoring skills. This meant they could quickly be left alone while I was taking care of more complex orders or replying to emails.
- Frequently using both Coreldraw and Excel, as well as Adobe Photoshop, to bring the customer's vision to life.
- Communicating every day with customers by email, phone and in person. Customers really appreciate the personal approach we take, making sure they are completely happy before going ahead while keeping the process moving as quickly as possible.
- Printing using a heat press requires concentration and attention to detail, to ensure the designs are central and in the correct position. Customers often compliment the quality of our work.
- Giving detailed information on our different printing processes and recommending the right one for the customer, to ensure high quality.

2019-present **Bartender, Greene King**

- Experience of management and supervision, training new staff to a good level so shifts can run more efficiently and everyone feels comfortable and confident.
- Working under pressure and thinking on my feet when things go wrong, to keep up with the fast paced atmosphere and make sure all customers are satisfied and mistakes are quickly corrected.
- Digital communication and marketing skills, playing a large part in several social media campaigns, which have helped with our online presence and are a talking point for customers.
- Adapting well to changes due to COVID, taking on waitressing, hosting and monitoring cleaning and safety measures, so customers feel safe and we can run as smoothly as possible.
- Upselling highlighted menu items and drinks deals to maximise sales.

Other Interests

- I have been rowing for the past six years and took on an executive role in my college boat club at University, teaching others how to cox. I did this while also acting as women's captain and treasurer for my college basketball team. I managed to balance these commitments with a heavy workload, and definitely rose to the challenge, making a real difference within both clubs.
- I also enjoy baking, reading and running, recently pushing myself to run my first 5K.
